POWDER COATED FINISHES

SERIES 150 Aluminum Railing Systems are built to give years of care-free enjoyment. The material combination of aluminum and powder coating result in a high strength, durable and corrosion resistant system.

Powder coating provides a wide range of performance properties, which include excellent resistance to corrosion, heat, impact and abrasion, fading from sunlight and extreme weather. The result is a uniform, durable, high-quality finish.

Standard Colors

Color reproduction is a reasonable representation.
Ask your sales rep. for actual color swatches.
