

Who?

Established over 30 years ago, Old Dutchman's Wrought Iron Inc. has been a family owned and operated business with first and second generation working side-by-side. The company grew through their commitment to time honored quality craftsmanship which has become the hallmark of their business. Old Dutchman's has responded to the call for higher quality architectural metal products from the private and commercial sector since 1974.

And, with this growth we are proud to announce that we have added **POWDER COATING** services to our capabilities.

The What, Why, How & Who of...

POWDER COATING

716 688.2034

What?

Just what is **POWDER COATING?**

Powder coating is an advanced method of applying a decorative and highly protective finishes to a wide range of materials and products that are used for both industrial and consumer applications.

Powder Coating delivers durable protection to your valuable metal items such as:

- Metal Fencing & Railings
- Automobile Frames, Wheels & Exposed Parts
- Motorcycle Frames, Wheels & Parts
- Industrial Fabrications
- Outdoor Patio Furniture
- Exterior Light Fixtures
- Building Materials
- Bike Frames
- Marine Parts
- Hot Rod Parts
- Architectural Signage
- Snow Plows

Why?

Why wouldn't you **POWDER COAT?**

Powder coating gives consumers, businesses, and industry one of the most economical, longest-lasting, and most color-durable quality finishes available.

Powder coated surfaces are more resistant to chipping, scratching, fading, and wear than other finishes. Color selection is virtually unlimited with high and low gloss, metallic, and clear finishes available.

- High-Temp Coatings
- Clear Coatings
- Epoxy Coatings
- Wrinkle Coatings
- Fluorescent Coatings
- Metallic Coatings
- Mirror Coatings
- Chrome Coatings
- Texture Coatings
- Veining, Antique & Hammertone Coatings
- Candy Coatings
- Out-gas forgiving Coatings
- Glow in the dark Coatings
- Anti-Graffiti Coatings
- High reflective Coatings
- Pearlescent Coatings

How?

Abrasive media blasting and powder coating go hand-in-hand.

The abrasive blasting process permits superior surface adhesion for powder coating or any other coating. Proper surface preparation is critical for the success of every cleaning or coating process. Propelling abrasive particles at a surface is the fastest and most thorough

means of cleaning, de-scaling, de-burring and removing oxides and other surface contaminants.

Blasting room:
9' x 13' x 20'

Our oven is capable of heating large items up to 8' x 8' x 18' & max. wt. up to 2,000 lbs.
